# Our Founder

Late Shri Thakurdas Ji Pagarani

He was one, who believed in Self-less Dedication through which he envisioned upliftment of his society and surroundings. He was a man of gifted business sense with zest & heart for philanthropic work.

His business empire spanned frontiers, reaching out to Sierra Leone, Cameroon, Ghana, Benin, Guinea, Liberia, Tanzania, UK, USA, Spain, Azerbaijan, Hong Kong, Thailand, Indonesia, Vietnam, Japan, Oman, Qatar & Bahrain. Such was his great entrepreneurial spirit that the Govt. Of Sierra Leone appointed him as the Hon. Consul General of Sierra Leone in India.

Seth Thakurdasji Choithram Pagarani saw to it that his vision and work find their way towards future, for which he established 3 trusts in India and 1 in Sierra Leone (West Africa).

- specialised fitting in Keratoconus
- corneal marginal degeneration
- Presbiopia
- Post refractive surgery fittings.

C-3R  
for treatment of Keratoconus

Specular

# The Departments

## Department of Cataract Surgery

The majority of surgeries are performed by modern phacoemulsification with foldable IOL technique. State-of-the-art phaco machines (Infiniti), the most sophisticated microscope and other supporting equipments are available to deliver the best.

Community patients also undergo sutureless procedure. The hospital offers special packages for patients who are below the poverty line. Best quality lenses are used for all patients.

# The Departments

## Department of Community Ophthalmology

One of the most important objective of Choithram Netralaya is to cater to economically underprivileged population. The hospital targets to treat 50% of the patients under this category at no cost.

Local social organisations help and co-ordinate for eye camps. A team of doctors & optometrists conduct screening of patients requiring eye surgeries and bring them to base hospital.

During the period of their stay the hospital bears the cost of surgeries including IOL, medicine and food. The hospital also takes care of their transportation from and back to their village.

# Education & Research

Clinical researches, presentation of papers of National and International meeting, publication of research work are routine part of academics. All patients' record is stored in MRD department to help research work. Institution has already started imparting training to young ophthalmologist, for 1 yr fellowship programme in comprehensive ophthalmology.
